1 Foreword

QX/T 392-2017 was issued by China Meteorological Administration on 30 October 2017 and has been in force since 1 March 2018.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard stipulates the classification principle and freezing damage level of Fuji apple flowering freeze damage grade. This standard is applicable to the monitoring, early warning, assessment and defense of the freeze damage of Fuji apples in China.

QX/T 392-2017 falls under ICS 07.160, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.
