1 Foreword

QX/T 395-2017 was issued by China Meteorological Administration on 30 October 2017 and has been in force since 1 March 2018.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the data requirements, monitoring indicators, discriminating conditions and calculation methods for monitoring in flood season in South China. This standard applies to the monitoring, forecasting, evaluation and service of the flood season in South China.

QX/T 395-2017 falls under ICS 07.060, in the field of natural and applied sciences.
