1 Foreword

QX/T 396-2017 was issued by China Meteorological Administration on 30 October 2017 and has been in force since 1 March 2018.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 10 pages in English translation.

2 Scope Preview

This standard specifies the monitoring indicators for the southwest rainy season and its identification methods and calculation methods. This standard applies to the prediction, monitoring, evaluation and service of the rainy season in Southwest China.

QX/T 396-2017 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.
