1 Foreword

QX/T 398-2017 was issued by China Meteorological Administration on 30 October 2017 and has been in force since 1 March 2018.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 42 pages in English translation.

2 Scope Preview

This standard stipulates the requirements for law enforcement agencies and law enforcement personnel who implement the lightning protection device design review and administrative punishment for the completion of inspection and acceptance of illegal acts, as well as the administrative procedures for filing, investigation and evidence collection, and punishment decisions. This standard is applicable to the administrative penalties of the meteorological authority or the law enforcement agency entrusted by it to the lightning

protection device design review and the completion and acceptance of illegal activities. This standard does not apply to administrative reconsideration, administrative litigation and application for court enforcement after the release of the administrative penalty decision.

QX/T 398-2017 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.

In this catalogue, QX/T standards carry edition years from 2001 to 2026.

3 About this standard

Issued by: China Meteorological Administration

English translation: about 42 pages

Chinese original: about 63,643 characters

4 Related standards

Standards on related subjects:
