1 Foreword

QX/T 400-2017 was issued by China Meteorological Administration on 29 December 2017 and has been in force since 1 April 2018.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 10 pages in English translation.

2 Scope Preview

This standard stipulates the basic provisions of lightning protection safety inspection, inspection contents, inspection procedures, rectification and handling of lightning protection safety hazards. This standard is applicable to inflammable and explosive construction projects and sites such as oil depots, gas storage, ammunition depots, chemical warehouses, fireworks, petrochemicals, etc., mining areas, tourist attractions or construction (construction) put into use in the lightning-prone area. Facilities such as

facilities that require separate installation of lightning protection devices, as well as lightning protection safety inspections for large-scale projects that require high lightning risk and have no lightning protection standards and require special demonstration. Other projects or sites may be referred to.

QX/T 400-2017 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.

In this catalogue, QX/T standards carry edition years from 2001 to 2026.

3 About this standard

Issued by: China Meteorological Administration

English translation: about 10 pages

Chinese original: about 15,156 characters

4 Related standards

Standards on related subjects:

GB/T 33679-2017 - Technical safety requirements of rocket production for rainfall enhancement and hail suppression

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

QX/T 394-2017 - Monitoring index of East Asian subtropical summer monsoon

QX/T 393-2017 - Monitoring indices of cold air processes

QX/T 390-2017 - Technical specifications for maintenance of 37 mm cloud-seeding artilery

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 47

Prefix QX/T: recommended standard.
