1 Foreword

QX/T 438-2018 was issued by China Meteorological Administration on 20 September 2018 and has been in force since 1 February 2019.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 10 pages in English translation.

2 Scope Preview

This standard specifies the calculation method for wind speed of bridge design. This standard applies to the design of bridge wind resistance design.

QX/T 438-2018 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.

In this catalogue, QX/T standards carry edition years from 2001 to 2026.

3 About this standard

Issued by: China Meteorological Administration

English translation: about 10 pages

Chinese original: about 15,179 characters

4 Related standards

Standards on related subjects:

GB/T 33679-2017 - Technical safety requirements of rocket production for rainfall enhancement and hail suppression

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

QX/T 430-2018 - Technical specification of lightning protection for firework and firecracker production enterprprises

QX/T 429-2018 - Greenhouse gases - Observation specification for carbon dioxide and methane - Off-axis integrated cavity output spectroscopy method

QX/T 428-2018 - Specifications for risk investiggation into disaster induced by rainstorm - Flood in smalland medium-sized river basin

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 47

Prefix QX/T: recommended standard.
