1 Foreword

QX/T 454-2018 was issued by China Meteorological Administration on 30 November 2018 and has been in force since 1 March 2019.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 14 pages in English translation.

2 Scope Preview

This standard specifies the data requirements, estimation methods, and treatment procedures for the estimation of the area of ??the satellite remote sensing straw burning overfire area. This standard applies to the use of satellite remote sensing data to carry out the business or research of straw burning area.

QX/T 454-2018 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.

In this catalogue, QX/T standards carry edition years from 2001 to 2026.

3 About this standard

Issued by: China Meteorological Administration

English translation: about 14 pages

Chinese original: about 21,287 characters

4 Related standards

Standards on related subjects:

GB/T 33679-2017 - Technical safety requirements of rocket production for rainfall enhancement and hail suppression

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

QX/T 449-2018 - Specifications for climatic feasibility demonstration - in-situ observation

QX/T 445-2018 - General acceptance specifications for cloud-seeding rocket

QX/T 444-2018 - Data format for surface layer flux measurement

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 47

Prefix QX/T: recommended standard.
