1 Foreword

QX/T 469-2018 was issued by China Meteorological Administration on 12 December 2018 and has been in force since 1 April 2019.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard stipulates the requirements for the planning, construction and other projects to carry out the climate feasibility study, the preparation of the program, the data collection, the selection of the meteorological station, the on-site meteorological observation, the data processing, the content and method of the demonstration, and the preparation and review of the report. This standard applies to the climate feasibility demonstration of planning and construction projects, and other projects can be used for reference.
