1 Foreword

QX/T 68-2007 was issued by China Meteorological Administration on 22 June 2007 and has been in force since 1 October 2007.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 6 pages in English translation.

2 Scope Preview

This standard specifies the use of black and gray instrument for atmospheric carbon black carbon aerosol methods of observation. Including the technical requirements, installation environment and the measuring method, and data recording format. This standard applies to meteorological and related industries in the determination of atmospheric black carbon aerosol concentration.
