1 Foreword

QX/T 782-2025 was issued by China Meteorological Administration on 16 December 2025 and has been in force since 1 March 2026.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 5 pages in English translation.

2 Scope Preview

This standard specifies the technical indicators, solvent composition, and maximum limits of harmful soluble elements for single-solvent gravure general-purpose plastic composite inks. It describes the corresponding test methods and specifies the inspection rules, marking, packaging, transportation, and storage requirements. This document applies to the production, inspection, and sale of single-solvent general-purpose plastic composite inks printed by gravure printing on treated biaxially oriented polypropylene, polyester, nylon, and
