1 Foreword

RB/T 004-2019 was issued by National Certification and Accreditation Administration on 26 June 2019 and has been in force since 1 July 2019.

The RB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard provides guidelines for the validation and evaluation of results of genetic amplification methods for genetic testing. This standard applies to genetic testing laboratories to verify the standard methods for genetic amplification of genetic testing. Note. This standard does not involve the verification of method specificity and robustness.

RB/T 004-2019 falls under ICS 03.120.20, in the field of services and company organization.

This catalogue holds 220 other RB/T standards in that field.

In this catalogue, RB/T standards carry edition years from 2013 to 2026.

3 About this standard

Issued by: National Certification and Accreditation Administration

English translation: about 15 pages

Chinese original: about 19,137 characters

4 Related standards

Standards on related subjects:

RB/T 033-2020 - Guidance on verification and validation of microbiological testing methods

RB/T 003.1-2019 - Evaluation of plant protection inputs in the production of organic products - Part 1: Technical specifications

RB/T 002-2019 - Technical specifications for verification and monitoring of inputs in the production of organic products

RB/T 001-2019 - Technical specifications for the evaluation of input products used in the production of organic products

5 Classification and status

International classification (ICS): 03.120.20

Chinese Standard Classification (CCS): A 00

Prefix RB/T: recommended standard.
