Foreword

RB/T 025 "Certification and Accreditation Supporting Trade Facilitation Information Technology and Service Specifications" is divided into 5 parts.

- Part 1. Basic principles;
- Part 2. Data crowdfunding;
- Part 3. Data quality control;
- Part 4. Information sharing;
- Part 5. Information services.

This section is Part 4 of RB/T 025.

This section is drafted in accordance with the rules given in GB/T 1.1-2009.

This part is proposed and managed by the National Certification and Accreditation Administration.

Introduction

Certification and recognition, as a technical means for the facilitation of international trade, are important for simplifying the coordination of trade procedures and accelerating the cross-border circulation of factors.

To promote.

This series of standards provides trades that use the certification and accreditation information platform as the technical carrier and crowdfunding data as the main source of certification and accreditation data.

Facilitate relevant requirements for information technology and services, and propose data crowdfunding, data quality control, information sharing, and information service specifications, which are beneficial to Governments, enterprises, individuals and other trade-related parties continue to obtain certification information, which facilitates trade while effectively reducing platform operation and maintenance cost.

This section determines the management and evaluation mechanism for platform information sharing, and scientifically builds national certification accreditation letters along the "Belt and Road".

The information structure system of information sharing has an important role in continuously maintaining the real-time and flexibility of information.

Certification and Accreditation Support Trade Facilitation Information Technology and Service Specification Part 4. Information Sharing

1 Scope

This part of RB/T 025 specifies the management and sharing of information in the process of certification and accreditation to support trade facilitation information technology and services.

Evaluation, and specifies the access rights and methods of information sharing, and gives the evaluation dimensions, methods and evaluation models of information sharing.

This section is applicable to the management and evaluation of information sharing that supports the facilitation of trade facilitation by accreditation based on crowdfunding data as the main source.
