1 Foreword

RB/T 034-2020 was issued by National Certification and Accreditation Administration on 26 August 2020 and has been in force since 1 December 2020.

The RB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 11 pages in English translation.

2 Scope Preview

This standard provides the determination of the measurement equipment (equipment for short) that needs to be calibrated, the method for determining the initial calibration period of the equipment, and the subsequent calibration of the equipment Method and application example of period adjustment: This standard applies to all institutions that need to determine and adjust the calibration cycle of their measuring equipment: Note: Institutions refer to testing laboratories, calibration laboratories, inspection institutions, reference material producers, proficiency testing providers, medical laboratories, etc:, collectively referred to as "institutions" below:

RB/T 034-2020 is filed under Chinese Standard Classification A 00, in the field of general, standardization and metrology.

This catalogue holds 54 other RB/T standards without an ICS number.

In this catalogue, RB/T standards carry edition years from 2013 to 2026.
