Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules of Standardization Documents" drafted.

This document is part 2 of RB/T 060 "Forensic/Forensic Science Proficiency Testing Implementation Guidelines". RB/T 060 has been released the following parts.

- Part 1: Forensic pathological identification;
- Part 2: Forensic clinical identification;
- Part 3: Forensic poison identification;
- Part 4: Document identification;
- Part 5: Identification of audiovisual data;
- Part 6: Road traffic accident vehicle speed identification.

Please note that some content of this document may be patented. The issuing agency of this document assumes no responsibility for identifying patents.

Introduction

This document is GB/T 27043 "General requirements for proficiency testing for conformity assessment" in the field of forensic identification/forensic science.

Professional application guide. Forensic clinical identification proficiency testing activities are qualitative and interpretive proficiency testing activities.

The key technical activities in the implementation process of force testing provide guidance, which is helpful to standardize the organization and implementation of the forensic clinical identification proficiency testing program.

This document does not involve the content of management requirements for proficiency

testing providers. For relevant content, please refer to GB/T 27043.

Forensic Expertise/Forensic Science Proficiency Testing Implementation Guide Part 2:
Forensic clinical identification

1 Scope

This document provides resources for the implementation of proficiency testing in forensic clinical identification, proficiency testing program design, proficiency testing items, and presentation to participants.

Guidance on work instructions, proficiency assessments and proficiency testing reports.

This document applies to the organization and implementation of a proficiency testing program for forensic clinical identification.

2 Normative references

The contents of the following documents constitute essential provisions of this document through normative references in the text. Among them, dated citations documents, only the version corresponding to that date applies to this document; for undated references, the latest edition (including all amendments) applies to this document.
