Introduction

my country's population aging continues to accelerate, and elderly care services have become a basic public service in an aging society. build a scientific and rational the elderly service standard system is an important basis for safeguarding the legitimate rights and interests of the elderly and promoting the establishment of a national unified elderly service quality standard and evaluation system.

foundation. The "Notice of the National Standards Committee of the Ministry of Civil Affairs on Printing and Distributing the Guidelines for the Construction of the Elderly Service Standard System" pointed out that in accordance with my country's elderly care service system There are three types of elderly care services. home-based elderly care, community elderly care, and institutional elderly care. Focusing on the development needs of the elderly service industry, the in the service standard system, the industry urgently needs and vacant standards, and accelerates the development by mobilizing social forces and other methods to fill the industry gap as soon as possible.

Focusing on the standardization and standardization development needs of home-based care services, explore the establishment of home-based care service certification standards, and build corresponding certification standards.

Certification standards and third-party certification systems are important means to promote the healthy and standardized development of home-based elderly care services. Introducing third-party conformity assessment Mechanism, with the help of certification and accreditation means, will help guide and promote the development of the elderly care service industry, improve the service capacity and level of elderly care institutions, and support the government.

Government management functions, improve customer and public satisfaction.

It has an important position and plays an important role in maintaining the health of the elderly. More and more seniors are in need of home-based care services Provide centralized dining, meal delivery, meal assistance and other services. Therefore, establishing an effective evaluation standard for meal services is essential for ensuring the elderly's eating and drinking.

Personal health and safety is of great importance.
