Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules of Standardization Documents" drafted.

Please note that some content of this document may be patented. The issuing agency of this document assumes no responsibility for identifying patents.

Introduction

Daodi medicinal materials are recognized as high-quality medicinal materials since ancient times, and are one of the most characteristic cores of traditional Chinese medicine in the field of traditional Chinese medicine resources.

precious cultural heritage. Carrying out authentic medicinal materials certification will help standardize the production management of authentic medicinal materials and protect the cultural value and brand of authentic medicinal materials Value, which is an important means to ensure the quality of authentic medicinal materials and promote the sustainable use of authentic medicinal materials. To formulate general requirements for the evaluation of authentic medicinal materials, not only will it help standardize the certification service process and improve work efficiency, it will also enhance the market competitiveness of certified companies and greatly improve the quality of authentic medicinal materials.

Brand influence is of great significance to the implementation of authentic medicinal materials certification.

According to the definition of "authentic medicinal materials" in the Law of the People's Republic of China on Traditional Chinese Medicine, this document takes the quality characteristics of authentic medicinal materials as the core, and fully considers the quality characteristics of authentic medicinal materials.

Consideration of the source of medicinal materials, historical evolution, habitat

characteristics and environmental safety requirements of authentic regions, production and processing and other quality characteristics of authentic medicinal materials.

Qualitative factors, focus on the inheritance and safety of authentic medicinal materials, and formulate general requirements for the evaluation of authentic medicinal materials.

General requirements for the evaluation of authentic medicinal materials

1 Scope

This document specifies the general requirements for the evaluation of authentic medicinal materials of plant, animal, fungal and mineral origin, including general rules, evaluation content, evaluation Report and result judgment.

This document is applicable to the evaluation of authentic medicinal materials by third-party certification bodies, and can also be referred to by Daodi medicinal material production organizations and other relevant institutions.

use.
