**CERTIFICATION AND ACCREDITATION INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

RB/T 093-2022

**In the field of social public security, network security
certification requirements for intelligent networking products
(English Translation)**

Issued on: October 11, 2022

Implemented on: January 1, 2023

Issued by: National Certification and Accreditation Administration

Table of Contents

Preface	
1 Scope	
2 Normative references	
3 Terms, Definitions and Abbreviations	
3.1 Terms and Definitions	
3.2 Abbreviations	
4 General requirements	
4.1 General	
4.2 Conformity assessment function method	
4.3 Design Developer	
4.4 Product Consistency Guarantee Capability	
4.5 Documentation Requirements	
5 Certification Requirements	
5.1 Definition of Product Category	
5.2 Design and development management	
5.3 Implementation of Design Development	
5.4 Detection of network security functions	
5.5 Evaluation of Network Security Assurance	
5.6 Determination of Product Consistency Guarantee Capability	
6 Certification results and effectiveness evaluation	
6.1 Certification	
6.2 Certification Level	
6.3 Certification Validity Maintenance	
Appendix A (Normative) Security Function Evaluation Requirements for Intelligent Networking Products	
A.1 Requirements for the evaluation of security functions of intelligent networking products of terminal equipment	
A.2 Safety function evaluation requirements for management platform intelligent networking products	
Appendix B (Normative) Security Assurance Evaluation Requirements for Intelligent Networking Products	
B.1 Safety Assurance Evaluation Requirements for Basic-level Intelligent Networking Products	

B.2 Safety Assurance Evaluation Requirements for Enhanced Intelligent Networking Products

Reference

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules for Standardization Documents" drafting.

Please note that some contents of this document may refer to patents. The issuing agency of this document assumes no responsibility for identifying patents.

1 Scope

This document specifies the general requirements, certification requirements, certification results and requirements for network security certification of intelligent networking products in the field of social public security.

Effectiveness evaluation.

This document is applicable to the third-party certification of intelligent networking products in the field of social public security.

2 Normative references

The contents of the following documents constitute the essential provisions of this document through normative references in the text. Among them, dated references for documents, only the version corresponding to the date is applicable to this document; for undated reference documents, the latest version (including all amendments) is applicable to this document.

GB/T 5271.8 Information Technology Vocabulary Part 8: Security GB/T 18336.1-2015 Information technology security technology Information technology security assessment criteria Part 1: Introduction and general Model GB/T 18336.2-2015 Information technology security technology Information technology security assessment criteria Part 2: Security functional components GB/T 18336.3-2015 Information Technology Security Technology Information Technology Security Assessment Criteria Part 3: Security Assurance Components GB/T 22239-2019 Basic Requirements for Network Security Level Protection of Information Security Technology GB/T 25069 Information Security Technical Terms GB/T 27000 Conformity assessment vocabulary and general principles GB/T 27065 Requirements for certification bodies for conformity assessment products, processes and services

3.1 Terms and Definitions

Defined by GB/T 27000, GB/T 27065, GB/T 5271.8, GB/T 25069 and GB/T 18336.1-2015 and the following Terms and definitions apply to this document.

3.1.1

Devices and/or platforms with information computing and processing capabilities that use network technology to achieve management and interaction.

Note 1: Intelligent networking products mainly include information collection, information processing, information transmission, information storage, information service and management, control and execution.

Software products, hardware products, combined software and hardware products.

Note 2: Common intelligent networking products in the field of social public security, such as anti-theft alarms with networking functions, video surveillance, access control, physical protection and others smart networking products.

3.1.2

An information system composed of intelligent networked products and other network components.
