Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

1 Scope

This document specifies the evaluation process, evaluation requirements, evaluation content and methods, and evaluation criteria for the personal information security of mobile smart terminal application software.

Result determination.

This document is applicable to certification bodies and technical verification bodies for testing, evaluating and Certification and other activities.

2 Normative references

The contents of the following documents constitute essential clauses of this document through normative references in this document.

For referenced documents without a date, only the version corresponding to that date applies to this document; for referenced documents without a date, the latest version (including all amendments) applies to this document.

GB/T 35273-2020 Information security technology Personal information security specification

3 Terms and definitions

The terms and definitions defined in GB/T 35273-2020 and the following apply to this document.

Application software developed for mobile smart terminals, including third-party application software pre-installed in mobile smart terminals, and Internet service providers Application software provided by the provider for downloading, installing and upgrading through mobile application distribution platforms such as websites and app stores.

Note: Abbreviated as "App".

[Source. GB/T 34975-2017, 3.3, modified] 3.2 Certification body an organization that engages in third-party certification activities related to products, services, processes, systems or people.

NOTE: A certification body may carry out testing and inspection activities itself or entrust another body to carry out these activities on its behalf.
