Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard is proposed and managed by the National Certification and Accreditation Administration.

This standard was drafted. Shandong Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China, China Inspection and Certification (Group) Co., Ltd., Qingdao Food and Drug Administration, Qingdao Hua Testing Technology Co., Ltd.

Introduction

For food inspection agencies, integrity is a service commitment to customers and a norm that constrains their behavior. Integrity is a food inspection agency the foundation of the business, the basic code. The food inspection agency only establishes the integrity management body based on morality, responsibility, and law.

To ensure the effective operation of the integrity management system, in order to enable the health and orderly development of food inspection agencies, in order to maximize the customer and city Field and government trust.

This standard combines the food inspection agency management characteristics, qualification conditions, technical characteristics, contract performance, social responsibility and other requirements for food inspection Institutional integrity factors and risk of loss of trust were analyzed, and the establishment, implementation, maintenance and continuous improvement of the integrity system of food inspection agencies were proposed.

Shi. This standard is the refinement of GB/T 31880-2015 "Basic requirements for the integrity of inspection and testing institutions" in the integrity management of food inspection agencies.

Seek to meet the integrity of the food inspection agency in terms of regulations, technology, management and responsibility by establishing a credit management system for food inspection agencies.

The requirements are conducive to improving the integrity management level of food inspection agencies.
