Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard is proposed and managed by the China National Certification and Accreditation Administration.

This standard was drafted. China National Certification and Accreditation Administration, China National Institute of Standardization, Beijing New Century Inspection Certification Co., Ltd., China Quality Certification Center, Fangyuan Mark Certification Group Co., Ltd., Shanghai Quality System Audit Center, Huaxia Certification Center Company, Beijing Sinochem Joint Certification Co., Ltd., Beijing Haidian District Finance Bureau, Jiangsu Xinyi Economic Development Zone Management Committee, Linyi City Technical Supervision Bureau.

Introduction

With the wide application of ISO 9000 quality management system international standards, more and more national administrative agencies began to use quality management.

The concept and method of the system to enhance its execution and credibility. The process and results of the certification are beneficial to the quality management system of government agencies.

Effective establishment and operation, but seeking certification is not the sole purpose of the national administrative agency to implement the quality management system.

State administrative agencies at all levels have an important responsibility in the work of "promoting the modernization of the national governance system and governance capacity". With the country line with the deepening of the reform of the political management system, the state administrative agencies have steadily transformed into a

government of law, responsibility, service and integrity. country when the administrative organization conducts the quality management system certification, it is related to the certification purpose, the certification process, and the requirements of the auditor.

The type of organization is significantly different. Therefore, the certification body needs to fully consider the characteristics and requirements of the state administration, and ensure that it can for certification services that are consistent with the characteristics of the state administration. For the specific administrative object of the national administrative agency, this standard aims to ensure certification.

The organization has the ability to implement quality management system certification for national administrative agencies in a consistent and impartial manner, thereby promoting the work of national administrative agencies.

Continuous improvement in quality and management.

This standard is adjusted in the "National Administration and Quality Management System Theory and Practice Research" of the National Certification and Accreditation Administration of China.

Based on the data and information obtained by the Institute, it mainly stipulates the ability of the certification personnel when the national administrative agency implements the certification.

The requirements of the certification process, etc., define the scope of technical services, and do not involve the understanding of the certification criteria and the accuracy of the mastery.

begging. The Understanding and Practice of the Application Quality Management System of National Administrative Organs compiled by the China National Certification and Accreditation Administration Committee and ISO 18091:2014 "Quality Management System Local Government Application ISO 9001:2008 Guide" can be used as a certification body and practitioners Accurately understand the reference materials of GB/T 19001 "Quality Management System Requirements".
