6.1 General requirements

Foreword

RB/T 242 "Green Product Certification Body Requirements" is currently divided into four parts.

--- Part 1. General;

--- Part 2. Environmental protection and resource conservation;

--- Part 3. Renewable energy use;

--- Part 4. Organic products.

This part is the second part of RB/T 242.

This part is drafted in accordance with the rules given in GB/T 1.1-2009.

This part is proposed and managed by the National Certification and Accreditation Administration.

This section drafted by. China National Accreditation Center for Conformity Assessment, Central United (Beijing) Certification Center Co., Ltd., National Certification and Accreditation Administration Certification Technology Research Institute, China Quality Certification Center, Beijing Xinhua Water Conservation Product Certification Co., Ltd., Beijing Zhongshui Runke Certification Co., Ltd.

Introduction

This part of the RB/T 242 "Green Product Certification Body Requirements" provides for the evaluation of environmental protection and resource conservation attributes of products.

The specific requirements that the certification body should meet.

The certification body is responsible for the stakeholders, including the customers of the certification body, the customers of the product certification organization, and ensuring that only the capabilities are allowed.

The certification personnel evaluate the environmental protection and resource conservation attributes of the product.

The purpose of this section is to enable all agencies and their associated certification personnel to have an environmental protection and resource conservation attribute evaluation of the product.

Having the general capabilities described in RB/T 242.1-2018 and the assessment of environmental protection and resource conservation attributes described in this section Price ability.

Certification of complex, multi-site or larger organizations will require sufficient capacity resources to ensure consistency of certification results.

In this part of the technical content, in Chapter 6, the certification program related to product environmental protection and resource conservation attribute evaluation is added.

General requirements and specific requirements for the professional competence of personnel, application reviewers, evaluators, certification decisions (including review). Appendix A gives A reference for environmental protection and resource conservation knowledge and skills that all types of certification personnel need to master during the certification process. This part and RB/T 242.1-2018 is used together.

Green product certification body requirements Part 2. Environmental protection and resource conservation

1 Scope

This part of RB/T 242 specifies resources for green product certification bodies that evaluate the environmental protection and resource conservation attributes of products.

Special requirements in terms of aspects.

This section applies to the establishment and implementation of a green product certification body that evaluates the environmental protection and resource conservation attributes of products.

Management system.
