Foreword

RB/T 242 "Green Product Certification Body Requirements" is currently divided into four parts.

- Part 1. General;
- Part 2. Environmental protection and resource conservation;
- Part 3. Renewable energy use;
- Part 4. Organic products.

This part is the fourth part of RB/T 242.

This part is drafted in accordance with the rules given in GB/T 1.1-2009.

This part is proposed and managed by the National Certification and Accreditation Administration.

This section drafted by. China National Accreditation Center for Conformity Assessment, Beijing Wuzhou Hengtong Certification Co., Ltd.

Introduction

This part of the RB/T 242 "Green Product Certification Body Requirements" stipulates that the certification body that certifies organic products should meet the requirements.

Set requirements.

The certification body is responsible to the stakeholders, including the customers of the

certification body and the customers who obtain the organic product certification organization, ensuring that only the permissible Certified personnel with competence to certify organic products.

The purpose of this part of the standard is to enable all organic product certification bodies and their certification personnel to have RB/T 242.1-2018 Describe the general capabilities and the ability to develop organic products as described in this section.

Certification of complex multi-site or larger organizations will require sufficient capacity resources to ensure consistency of certification results.

In this part of the technical content, some terms have been added in Chapter 3, and the certification side related to organic product certification has been added in Chapter 6.

The professional ability requirements of the staff of the case, the application for reviewers, the evaluators, and the certification decision (including review) have increased the organic production in Chapter 7.

Special requirements for the product certification process. Appendix A gives the knowledge and skills that all types of certification personnel need to master during the organic product certification process.

test. This section should be used in conjunction with RB/T 242.1-2018.
