Foreword

This standard is drawn from GB/T 21084-2007 "Green Hotel", GB/T 14308-2003 "Hotel Star Rating and Evaluation" and domestic relevant local standards.

This standard was proposed by the Ministry of Commerce of the People's Republic of China. This standard is under the jurisdiction of the National Food Service Standardization Technical Committee.

Introduction

With the rapid development of China's social and economic development level and the degree of opening up to the outside world, the external environment and market structure faced by the hotel industry has changed. A big change has taken place, and the market positioning and division of labor according to different types of customers and consumption levels have become increasingly refined, especially with the recent domestic rise of tourism and business travel activities. The economy hotel has become a great place for such a specific market positioning.

Development has played an important role in optimizing the industrial structure of the accommodation industry, meeting the housing needs of low- and middle-income consumers, and promoting domestic consumption.

In order to scientifically guide the investment, operation and consumption of economic hotels, this standard has been formulated to further improve and develop our economy hotels.

It is in line with China's actual situation and is consistent with international development trends. At the same time, with the continuous development and consumption of China's economy hotels, changes in the needs of the person, this standard still needs to be revised.

from time to time.
