Test method for hydraulic excavator GB/T 7586 General rules for the circulation of used equipment

3 Terms and definitions

SB/T 10529 and the following terms and definitions apply to this document.

Used excavator Has been used, and re-enter the market circulation of excavators.

Used excavator quality quality of used excavator Used excavator in the use, technology, safety, environmental protection and other aspects of the applicable characteristics.

Used excavator quality identification quality appraisal of used excavator According to the relevant national standards or technical specifications for the quality of second-hand excavator to identify and determine the special activities.

Vetoing items

Personal safety, equipment, the main use of the function, the use of performance and equipment identification and the environment has a significant impact and can not be missing and failure project.

Key item key items

For personal safety, equipment mainly uses functions, the use of performance and life and the environment has a significant impact on the project.

Important item important items the main function of the equipment, the use of performance and life have a greater impact on the project.

General item

The main function of the equipment, the use of performance and life effects of smaller projects.
