What this standard covers

This standard specifies the rigid spherical sampling and sample preparation plastic float, appearance, mass (weight), , buoyancy experiment with floating rates, diameter impact resistance, work pressure, crushing pressure test and inspection methods and float floating rate. This standard applies to rigid inspection and test spherical plastic fishing float physical and mechanical properties. Inspection and testing for other purposes, and other hard plastic shapes may also refer to the use of the float.

Document data

International classification (ICS): 65.150.

Chinese classification (CCS): B56.

Estimated length of the Chinese original: 6,614 words.

Supersedes the earlier edition SC/T 5002-1995.
