What this standard covers

This standard specifies the assessment of grease in high temperature, high speed and light load operation of ball bearings in the performance test methods. This standard adopts the International System of Units (SI) units. This standard is not showing all its security problems related to the use, so the user before the use of this standard to establish appropriate safety and health practices and determine the applicability of the management system.

Document data

International classification (ICS): 75.100.

Chinese classification (CCS): E36.

Estimated length of the Chinese original: 10,121 words.

Adopted international standard: ASTM D3336-2005, MOD.

Supersedes the earlier edition SH/T 0428-1992.
