What this standard covers

This standard specifies test methods detergency diesel oil simulation assessment. This standard applies to analog assessment detergency diesel oil. This standard specifies the equipment and diesel oil gas simulation detergency when assessing traffic flow sample, grading and other reaction conditions. This standard specifies the test temperature and time CC, CD clean diesel engine oil level when analog assessment. This standard does not apply to analog assess diesel oil phenols than 2% of the lubricant additive detergency.

Document data

International classification (ICS): 75.1.

Chinese classification (CCS): E34.

Estimated length of the Chinese original: 10,145 words.
