What this standard covers

This standard specifies the four classifications of two-stroke gasoline engine oil, the classification is based on the performance of low-temperature flow properties miscible lubricants and gasoline and classification. This standard specifies the test methods for measuring miscible two-stroke gasoline engine oil and gasoline and liquidity. This standard applies to two-stroke gasoline engine oil. This standard does not recommend safety issues, associated with its use if it. Before using the user of this standard has the responsibility to establish appropriate safety and health, and to determine the scope of application of the method by regulatory restrictions.

Document data

International classification (ICS): 75.1.

Chinese classification (CCS): E34.

Estimated length of the Chinese original: 7,726 words.

Adopted international standard: ASTM D4682-1987, EQV.
