What this standard covers

This standard specifies the method for determining zeolite and alumina-based catalysts in the palladium content by atomic absorption spectrometry. This standard applies to fresh and used as a carrier of zeolite and alumina containing palladium catalyst, palladium content in the range of 0.020% (m/m) ~ 0.900% (m/m).

Document data

International classification (ICS): 75.08.

Chinese classification (CCS): E60.

Estimated length of the Chinese original: 7,711 words.

Adopted international standard: ASTM D5153-1991, NEQ.
