What this standard covers

This standard provides a noncombustible material impregnated edge flame burning liquid persistence method. This standard for the safe transport and storage can provide relevant information. This method can not determine the liquid flame spray performance. This standard does not apply to certain adhesion test plate of rice aqueous solution or emulsion.

Document data

International classification (ICS): 75.080.

Chinese classification (CCS): E30.

Estimated length of the Chinese original: 8,829 words.

Adopted international standard: ISO 14935-1998, MOD.
