What this standard covers

This standard specifies the assessment of the performance of diesel engine oil temperature detergency test methods, including the formation of piston deposits trend, piston rings, piston ring and cylinder liner wear. This standard applies to assessment of single and multi-grade oil, such as CF, CF-2, MIL-PRF-2104 and other diesel engine oil.

Document data

International classification (ICS): 75.100.

Chinese classification (CCS): E34.

Estimated length of the Chinese original: 54,568 words.

Adopted international standard: ASTM D6618-2004, MOD.
