### What this standard covers

This standard specifies the vapor pressure of the automatic analyzer, measured under the reduced pressure of air containing volatile liquid petroleum products total vapor pressure method. This standard applies to a boiling point above 0°C, and at 37.8°C, under the conditions of the gas-liquid ratio of 4:1 for the 7kPa ~ 130kPa vapor pressure of liquid petroleum products. Determination of the amount of all liquid samples 1mL ~ 10mL. Without regard to the dissolution of the sample water.

### Document data

International classification (ICS): 75.080.

Chinese classification (CCS): E30.

Estimated length of the Chinese original: 9,991 words.

Adopted international standard: ASTM D5191-2004a, MOD.
