What this standard covers

This standard specifies the technical requirements, sampling, test methods, inspection rules, signs, labels, accompanying documents, packaging, transportation and storage of diethylene glycol for industrial use. This standard is applicable to diethylene glycol for industrial use produced by direct oxidation, hydration, and separation of ethylene as a raw material. It is mainly used as a monomer for the production of unsaturated resins, polyurethanes, and morpholine. Agents, insulation agents, softeners and solvents, etc.

Document data

Chinese classification (CCS): G17.
