What this standard covers

This standard specifies equipment and methods for taking industrial cracked C4 and other C4 liquid hydrocarbon samples for analysis. This standard applies to the use of industrial cracked C4 and other C4 liquid hydrocarbon samples. This standard contains relevant recommendations for the location of on-site sampling points for pipelines or storage tanks, and the user is responsible for ensuring that the location of sampling points can be set to take representative samples.

Document data

International classification (ICS): 71.080.15.

Chinese classification (CCS): G17.

Estimated length of the Chinese original: 9,930 words.

Supersedes the earlier edition SH/T 1142-2009.
