What this standard covers

This standard specifies the determination of the density of synthetic rubber latex temperature at 5°C to 40°. This standard applies to synthetic rubber latex. This standard specifies the quality can not be directly weighed latex or laboratory where the temperature can not be controlled, to calculate the mass use of a known volume of latex density determination.

Document data

International classification (ICS): 83.040.10.

Chinese classification (CCS): G34.

Estimated length of the Chinese original: 7,712 words.

Adopted international standard: ISO 705-1994, EQV.

Supersedes the earlier edition SH/T 1155-1992.
