What this standard covers

This standard specifies the determination of acrylonitrile butadiene rubber (NBR) vulcanizates swollen mass change of the two methods. When the measurement result of dispute, the reference shall method ?? is a method for arbitration. This standard applies to butadiene and acrylonitrile as monomer, acrylonitrile produced by emulsion method butadiene rubber (NBR).

Document data

International classification (ICS): 83.060.

Chinese classification (CCS): G34.

Estimated length of the Chinese original: 6,685 words.

Supersedes the earlier edition SH/T 1159-1992.
