What this standard covers

This standard specifies the product classification, technical requirements, sampling, test methods, inspection rules, signs, labels and accompanying documents, packaging, transportation and storage of industrial tert-butanol. This standard applies to industrial tert-butanol produced by isobutene hydration and isobutane co-oxidation. The product is mainly used as an organic chemical raw material for the manufacture of denatured alcohol, spices, paints and high-purity isobutylene, etc. TBA-99 can also be used as a raw material for the manufacture of medicines.
