What this standard covers

This standard specifies the purity and impurity content of industrial triethylene glycol by gas chromatography. This standard applies to triethylene glycol content of not less than 80.0% (mass fraction), ethylene glycol, diethylene glycol impurity content of not less than 0.01% (mass fraction), tetraethylene glycol impurity content of not less than 0.02% (Mass fraction) of the sample.

Document data

Chinese classification (CCS): G17.

Estimated length of the Chinese original: 7,787 words.
