What this standard covers

This standard specifies the naming, requirements, test methods, inspection rules, signs and accompanying documents, packaging, transportation and storage of polypropylene resins for spunbonded nonwoven fabrics. This standard applies to granular propylene homopolymers containing additives prepared by the polymerization of propylene under the action of a catalyst, and used for non-woven fabrics (non-woven fabrics) produced by spunbond and spunbond/meltblown combined processes.

Document data

International classification (ICS): 83.080.20.

Chinese classification (CCS): G32.

Estimated length of the Chinese original: 9,920 words.
