What this standard covers

This standard specifies a method for determining the short-chain branching distribution of ethylene-??-olefin copolymers using the differential scanning calorimeter (DSC) continuous autonucleation and annealing (SSA) thermal fractionation method. This standard is applicable to the determination of short-chain branching distribution of ethylene-??-olefin copolymers and their products.

Document data

International classification (ICS): 83.040.20.

Chinese classification (CCS): G31.

Estimated length of the Chinese original: 22,224 words.
