What this standard covers

This standard specifies the determination method of the soluble fraction content of polypropylene in 1,2-dichlorobenzene/1,2,4-trichlorobenzene in each temperature range from room temperature to the temperature at which the sample is completely dissolved. This document applies to polypropylene resins, including homopolypropylene (PP-H), propylene impact copolymer (PP-B) and propylene random copolymer (PP-R).

Document data

International classification (ICS): 83.080.20.

Chinese classification (CCS): G31.
