What this standard covers

This standard specifies the basic requirements for seismic action, seismic checking and seismic measures for non-buried pipelines in petrochemical industry. This standard is applicable to the seismic design of non-buried metal pipelines in petrochemicals where the basic seismic acceleration is not more than 0.40g, or the seismic fortification intensity is 9 degrees or less, and the nominal pressure is not more than 42MPa. Not suitable for seismic design of long-distance pipelines.

Document data

International classification (ICS): 75.180.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 12,182 words.

Supersedes the earlier edition SH/T 3039-2003.
