What this standard covers

This standard specifies the equipment, pipelines, system codes and commonly used design illustrations used in the design of heating, ventilation and air conditioning for petrochemical buildings. This standard is applicable to the heating, ventilation and air conditioning design of production plants and auxiliary buildings of newly-built, expanded or reconstructed petrochemical plants. The figures not given in this standard suggest the use of national standard GB/T 50114 "HVAC standards" relevant painting method.

Document data

International classification (ICS): 01.080.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 24,216 words.

Supersedes the earlier edition SH/T 3102-2000.
