What this standard covers

This standard stipulates the technical requirements for the design of raw coal (fired) coal preparation systems for coal chemical industry. This standard is applicable to the engineering design of new, reconstructed or expanded chemical companies that use coal as raw materials. The preparation of coal-water slurry and the preparation of coal powder bars are not suitable for the boiler plant engineering design.

Document data

International classification (ICS): 27.010.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 34,314 words.
