What this standard covers

This standard specifies the design requirements for the post-processing (packaging) system of petrochemical powder products. This standard applies to the engineering design of the metering, packaging and palletizing systems for petrochemical powder products. This standard does not apply to the packaging design of barreled products.

Document data

International classification (ICS): 75.180.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 41,499 words.
