What this standard covers

This standard specifies the safety inspection of petrochemical engineering design documents and the requirements for designers to conduct safety self-inspection of design content during the engineering design stage. This standard applies to newly built, rebuilt or expanded petroleum refining, petrochemical, and coal-based engineering projects for fuel and chemical products.

Document data

International classification (ICS): 13.100.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 107,124 words.
