What this standard covers

This standard specifies the technical requirements for petrochemical oil blending facilities. This standard applies to the design of new construction, expansion and reconstruction projects of oil product blending facilities in petrochemical enterprises, coal chemical enterprises, petroleum depots, and oil pipeline stations (depots). This standard does not apply to the engineering design of oil additive facilities and mixing facilities that do not require proportions of oil components.

Document data

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 22,263 words.
