What this standard covers

This standard specifies the basic provisions, system design, components, water supply, layout, hydraulic calculation, construction and acceptance of fixed water spray, water sprinkler and foam sprinkler fire extinguishing systems for process equipment, tank groups and steel structures in production units or oil and gas processing facilities that use petroleum, coal or natural gas as raw materials to produce fuels or chemicals. This standard applies to new, rebuilt and expanded petrochemical projects, oil and gas projects and coal chemical projects.
