What this standard covers

This standard specifies the requirements for materials, design, manufacturing, inspection and acceptance of blast and induced draft (including composite) steel air-cooled heat exchangers for petrochemical plants. This standard applies to air-cooled heat exchangers for new, rebuilt and expanded devices of petrochemical enterprises. This standard applies to air-cooled heat exchangers with a design pressure not exceeding 35MPa. The design temperature range applicable to this standard is determined according to the allowable use temperature of the material.
