What this standard covers

This standard specifies the technical requirements for the selection, inspection and acceptance of metal hoses for pipeline projects. This standard is applicable to the selection, inspection and acceptance of metal hoses used in petrochemical and coal chemical pipeline projects to compensate for pipeline displacement and foundation settlement, earthquake resistance and vibration absorption. This standard does not apply to instrument metal hoses.

Document data

International classification (ICS): 23.040.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 24,244 words.

Supersedes the earlier edition SH/T 3412-1999.
